

This spring, Malamalama Waldorf School received a donation of two light poles, light fixtures and electrical wiring to illuminate the parking lot.

The entire project was supported by **Big Island Electrical Service, LLC** who coordinated donations, organized transport of materials, as well as, provided the labor for erecting the poles and wiring the fixtures.

I & R Utility Line Excavating also supported this project by digging the holes for the poles.

A special thanks to parent volunteer, Tabetha Block, for spearheading the entire project.
