

Memorial Garden Update

This summer we have continued our improvements to the MWS Memorial garden.

Before the end of the school year we had a large area cleared out of most of the weed trees. With the help of the lower grades during the gardening classes we planted a few fruit trees and some cover crops to begin taking back the land. This includes some banana trees, a bread fruit tree, star fruit tree, Jabotacaba, a tangerine tree and a Lychee tree.

We would like to recognize Brooks & Lumjuan Addison of Aloha Farms for their generous donation of fruit trees to MWS!

In July some wonderful volunteers got together and removed much of wild growth in the memorial garden area.

We then took the chipped wood from the weed trees and mulched around our new plants and made trails. Including a circle area that will be a lovely place to sit and watch the children play in the school grass area.

We just need to add a bit of color, keep the weeds down and add two bench seats for our sitting area.

Come take a look and welcome all of our new plants!
